

College Credits

Calvert County Public Schools and College of Southern Maryland have a number of *articulation agreements* in place to jump start higher education for students who are interested in Technology Preparation Programs at the Calvert Career Center. These agreements allow students to earn free college credits for completing certain high school courses offered mainly at the Calvert Career Center. These classes offered at the Career Center are also part of the Pathway to fulfill graduation requirements. There is *no cost* to the students to receive these credits. It is a serious jump start when you consider the fact that some classes we have at the Calvert Career Center offer anywhere between 3 to 15 college credits at the College of Southern Maryland. These credits are credits you *do not have to* write extra papers for and *you do not have to pay for*.

Why Technology Education?

Our students, if they do well in their program of choice will be able to get an entry level job in their field getting paid more than a job a typical entry level job.

Having skills does pay off, and there is no expiration date on them.

How do I get started?

See your high school counselor

Make sure to include these courses carefully, when you set up your 4 year plan
